MORELAND SURGERY CENTER
1111 Delafield Street, Suite 100, Waukesha, WI 53188 (262) 928-4300

PATIENT NAME : JAVIER RAMOS _____

MRN : 00006135

DATE OF BIRTH : 02/20/2008

DATE OF SERVICE : 05/08/2013

HISTORY OF PRESENT ILLNESS : Habia is a 5-year-old male patient with history of wax impactions and old tubes that have extruded from the ear canal. He enters now for ear cleaning and possible repeat tympanotomy and tube placement. He has been having some ear aches again his general health is being good except for this. No allergies or bleeding tendencies.

FAMILY HISTORY : Noncontributory.

PHYSICAL EXAMINATION : General Appearance exam currently shows that his neck is soft, nontender. No adenopathy or thyromegaly. HEENT - Ear canals are filled with wax and old tubes. Nasal exam is clear. Oral exam show no evidence of inflammation. Lung - Clear to auscultation. Heart rate Regular. Abdomen - Soft and nontender. Extremities - Negative without cyanosis or clubbing.

IMPRESSION : Wax impaction and possible recurrent serous otitis media.
Recommend ear cleaning and possible tympanotomy and tube placement.
